1

Leadership - Simple Definition

The skill of positively influencing people to work enthusiastically toward goals identified as being for the common good.

2

Servant Leadership

Aubrey Malphurs: Servant leadership "the humble service of others based on our love for them."

Dr. Kent Keith: Servant leadership touches our spirits and connects with our souls. It resonates with our deepest desires for ourselves, our families, and the world. It allows us to be who we are really meant to be. Serving by leading is a way to find joy, and to share that joy with everyone with whom one lives and works.
