

A top-down view of an architectural workspace. The background is a detailed architectural floor plan with various rooms numbered 1 through 32. The plan includes dimensions, grid lines (1-3 and A-E), and symbols for doors, windows, and stairs. In the foreground, several drafting tools are scattered: a large wooden ruler, a protractor, a compass, a pencil, and a set square. A wooden pencil sharpener is also visible. The overall scene is brightly lit, with soft shadows cast by the tools.

Designing Spaces for the Future - Accessibility and Inclusivity

By: Nathan Carlson and Gage Johnson

Are you looking to design a new space?

Updating an existing one?

Considerations?

Universal
Design
Approach

Flexible
Learning
Environments

Future Proofing
Spaces

Here are key things to consider:

- **Assessment of Existing Conditions** - Structural integrity, mechanical systems, safety features.
- **Stakeholder Input** - Teachers, students, parents, administrators.
- **Budget and Funding** - Prioritize essential upgrades and allocate resources.
- **Regulatory Compliance** - Building codes, zoning regulations, ADA requirements.
- **Safety and Security** - Including fire safety measures, emergency exits, security cameras, access controls, and intrusion detection systems.
- **Community Engagement** - Keep stakeholders informed about project milestones, timelines, and potential impacts.
- **Accessibility and Inclusivity** - Design the classroom to be inclusive of students with diverse needs and abilities.
- **Technology Integration** - Sufficient power outlets, data ports, and connectivity options to support technology.
- **Energy Efficiency and Sustainability** - Building practices to reduce environmental impact, lower operating costs, and promote resource conservation.
- **Health and Wellness** - Natural daylighting, indoor air quality improvements, ergonomic furniture, and recreational areas.
- **Aesthetic Enhancements** - Modern finishes, landscaping, artwork, and wayfinding signage.
- **Construction Phasing and Logistics** - Minimize disruptions to school operations and ensure the safety.

UNIVERSAL DESIGN

101

The diagram consists of two blue rectangular boxes. The left box has a light blue border and a light blue arrow pointing upwards from its top center. The right box has a dark blue border and a dark blue arrow pointing downwards from its bottom center. The text inside each box is white.

Classrooms:

Adjustable desks and tables

Accessible seating
arrangements

Visual aids and materials

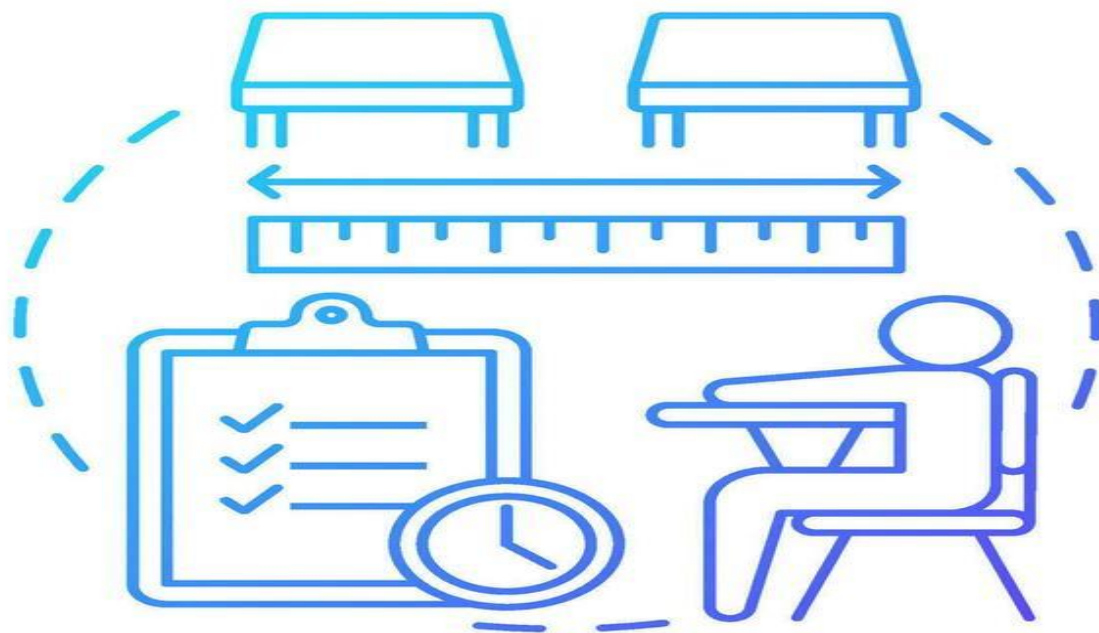

Hearing loop systems or
assistive listening devices

Hallways and Corridors:

Wide and unobstructed
pathways for easy navigation.

Tactile strips or floor markings
for students with visual
impairments.

Signage with both visual and
tactile information.

**FLEXIBLE LEARNING
ENVIRONMENTS**

The diagram consists of two blue rectangular boxes positioned side-by-side. The left box has a light blue border and a light blue arrow pointing upwards from its top center. The right box has a dark blue border and a dark blue arrow pointing downwards from its bottom center. Both boxes contain white text.

Libraries:

Adjustable computer stations and furniture for personalized use

Quiet spaces or sensory-friendly areas for students who may need a break.

Technology Integration:

Accessible computer stations and software for students with different abilities.

Screen readers and voice recognition software.

Closed captioning for video content.

The Future

NEXT EXIT 

1

Flexibility in Design

Convertible Classrooms, Mobile furniture, Multi-function learning spaces, Writable surfaces, etc.

2

Future Ready and Adaptable Infrastructure

IT infrastructure, Wireless tech, Interactive displays, Building management systems, etc.

3

Versatile Learning Zones

Outdoor learning spaces, Collaborative corners, breakout rooms, Maker spaces, etc.

4

Sustainable Practices

Renewable energy, Solar, green roofs, water recycling, Sustainable materials, etc.

5

Continuous Evaluation and Adaptation

Needs assessment, technology advancements, energy audits, safety and security, etc.

BENEFITS

1	Universal Access for all Students	✓	<ul style="list-style-type: none">• Ensures that all students, regardless of physical abilities, can navigate the school environment independently.• This inclusivity promotes equal opportunities for learning and socializing.
2	Enhanced Learning Environments	✓	<ul style="list-style-type: none">• Contribute to a positive learning atmosphere.• Students feel valued, accepted, and engaged when they can comfortably access classrooms, common areas, and educational resources.
3	Positive Impact on Mental Health	✓	<ul style="list-style-type: none">• Contribute to positive mental health by reducing feelings of isolation or exclusion.• Students with disabilities experience increased self-esteem and well-being when they can fully participate in school life.
4	Future-Proofing for Changing Needs	✓	<ul style="list-style-type: none">• Anticipates and accommodates future changes in student demographics, diverse learning styles, and evolving educational methodologies.• Ensures that the school environment remains relevant and adaptable.
5	Educational Equity	✓	<ul style="list-style-type: none">• Aligns with the principle of educational equity, ensuring that every student has access to the same educational opportunities and resources.• This supports a fair and just learning environment.
