

# What is a microgrid and how can it help our school afford electrifying our fleet?

MIDWEST  
*Facility Masters*  
CONFERENCE

# Today's Speakers

**TIM FARQUER**

**Superintendent**  
Williamsfield Schools  
**Administrative Lead**  
Bus-2-Grid Initiative  
**Senior Advisor**  
World Resources Institute

**KATY GLYNN**

**Account Executive**  
Siemens Smart Infrastructure  
Energy & Performance Services

# MICROGRID PROJECT OPERATING SINCE 2014

## Princeton Industrial Research Building

### PLUGTOGRID™ DESIGN:

Siemens Electrical infrastructure, battery storage, PV, EV Chargers and SCADA integration (Microgrid) for a complete solution providing "green" energy for EV charging and backup power for the building.

## Options for Winners and “Waiters”

**Awards this month:** \$965 million

**Going forward:** \$5 billion over 5 years

- How many buses?
- How many in IL?
- How many in WI?

**Who is in the room?**

For those getting money,  
let's maximize the positive impact!

For the rest of us,  
let's get a strong foundation in place!

# Unique Value Propositions of Transportation as a Service

Reduced **carbon footprint**

**E2E value chain** coverage

**Vendor agnostic** to complement Siemens and other best-in-class offerings

**Assuming and managing operational risk** for customers

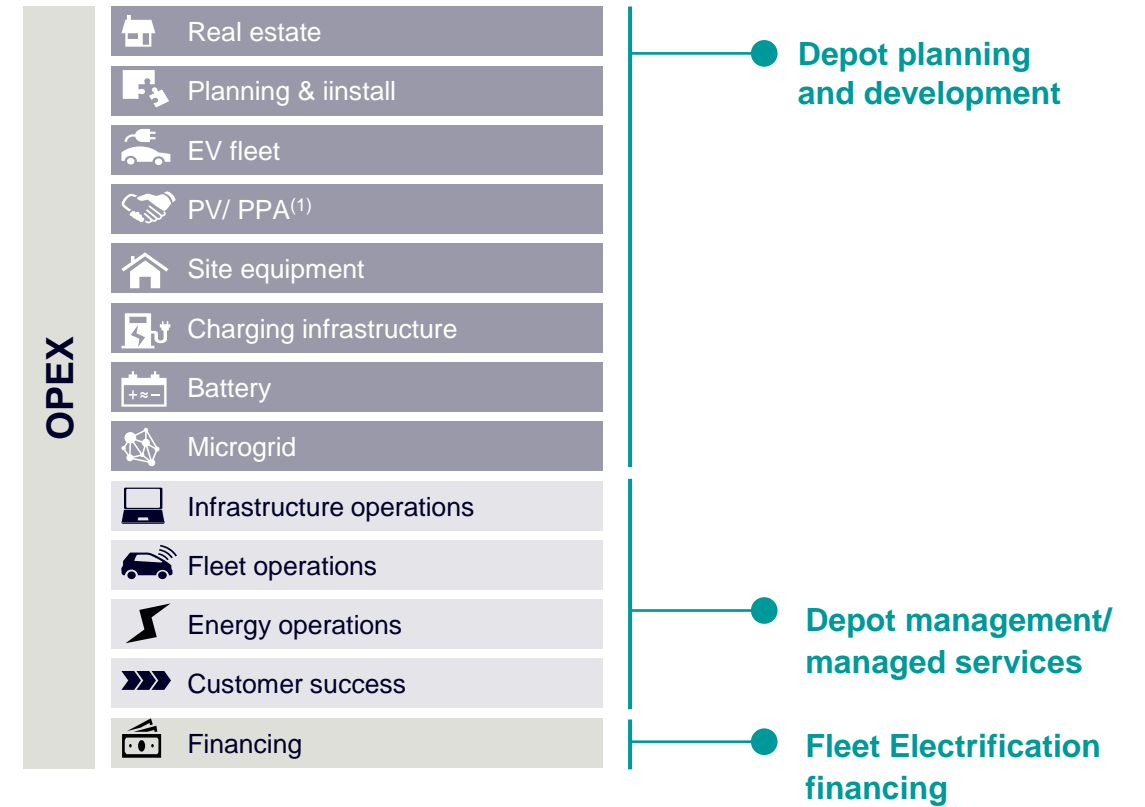

**Collaborating with optimal solution partners** to mitigate risks, create exceptional customer value

Enabling **new, competitive TaaS models** via **unique financing arrangements** and partners

## Transportation as a Service (TaaS)

1) Power purchase agreement

## What Can You Hope to Get Out of This Session?

1) What is Causing Interest in Electric School Buses?

2) What is a Microgrid?

3) Should I Explore a Microgrid for My School?

4) How Can a Microgrid Help My District Afford to Electrify Our Transportation Fleet?

Case Study:  
Williamsfield Schools, IL

# Everybody's Going Green!

## Dirty Buses = Sick Kids

School buses are the largest form of mass transportation in our country, transporting **25+million kids each day**

Children breathe **50% more air per pound of body weight** than adults and their lungs are still developing, making them especially vulnerable to cancer and respiratory diseases caused by diesel pollution.

A child sitting in the back of a school bus with windows closed is exposed to **4x more diesel** pollution than a child riding in a car in front of the same bus.

## What Can You Hope to Get Out of This Session?

1) What is Causing Interest in Electric School Buses?

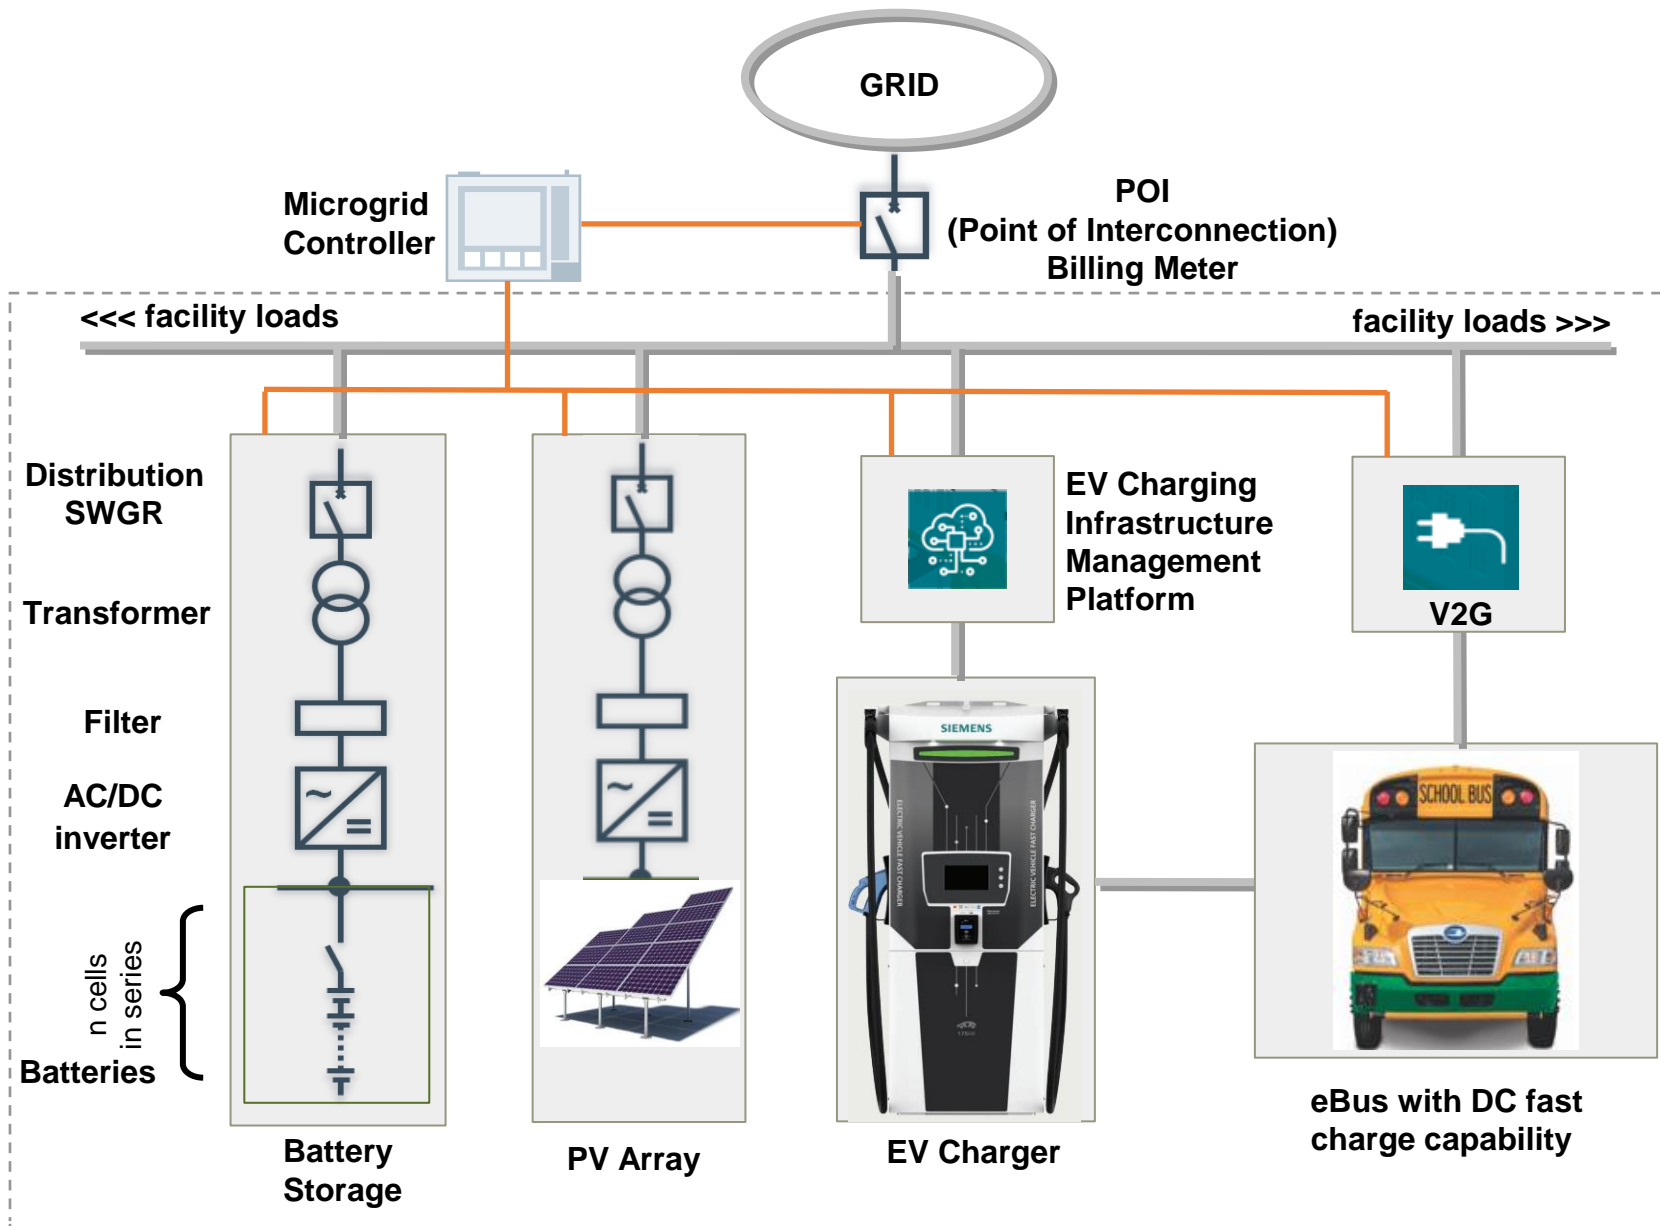

2) What is a Microgrid?

3) Should I Explore a Microgrid for My School?

4) How Can a Microgrid Help My District Afford to Electrify Our Transportation Fleet?

Case Study:  
Williamsfield Schools, IL

## Example BESS Sizing & Features:

500 kW Modular Blocks

Advanced controls allow integration of PV assets

Advanced safety features for Li-Ion batteries

Critical loads can be fed from BESS during grid disturbances

Building will not see impact of charging load and PV+battery will also:

- ✓ Lower Capacity and Transmission Charges
- ✓ Reduce Energy Consumed from Grid
- ✓ Demand Response Revenues

## What Can You Hope to Get Out of This Session?

1) What is Causing Interest in Electric School Buses?

2) What is a Microgrid?

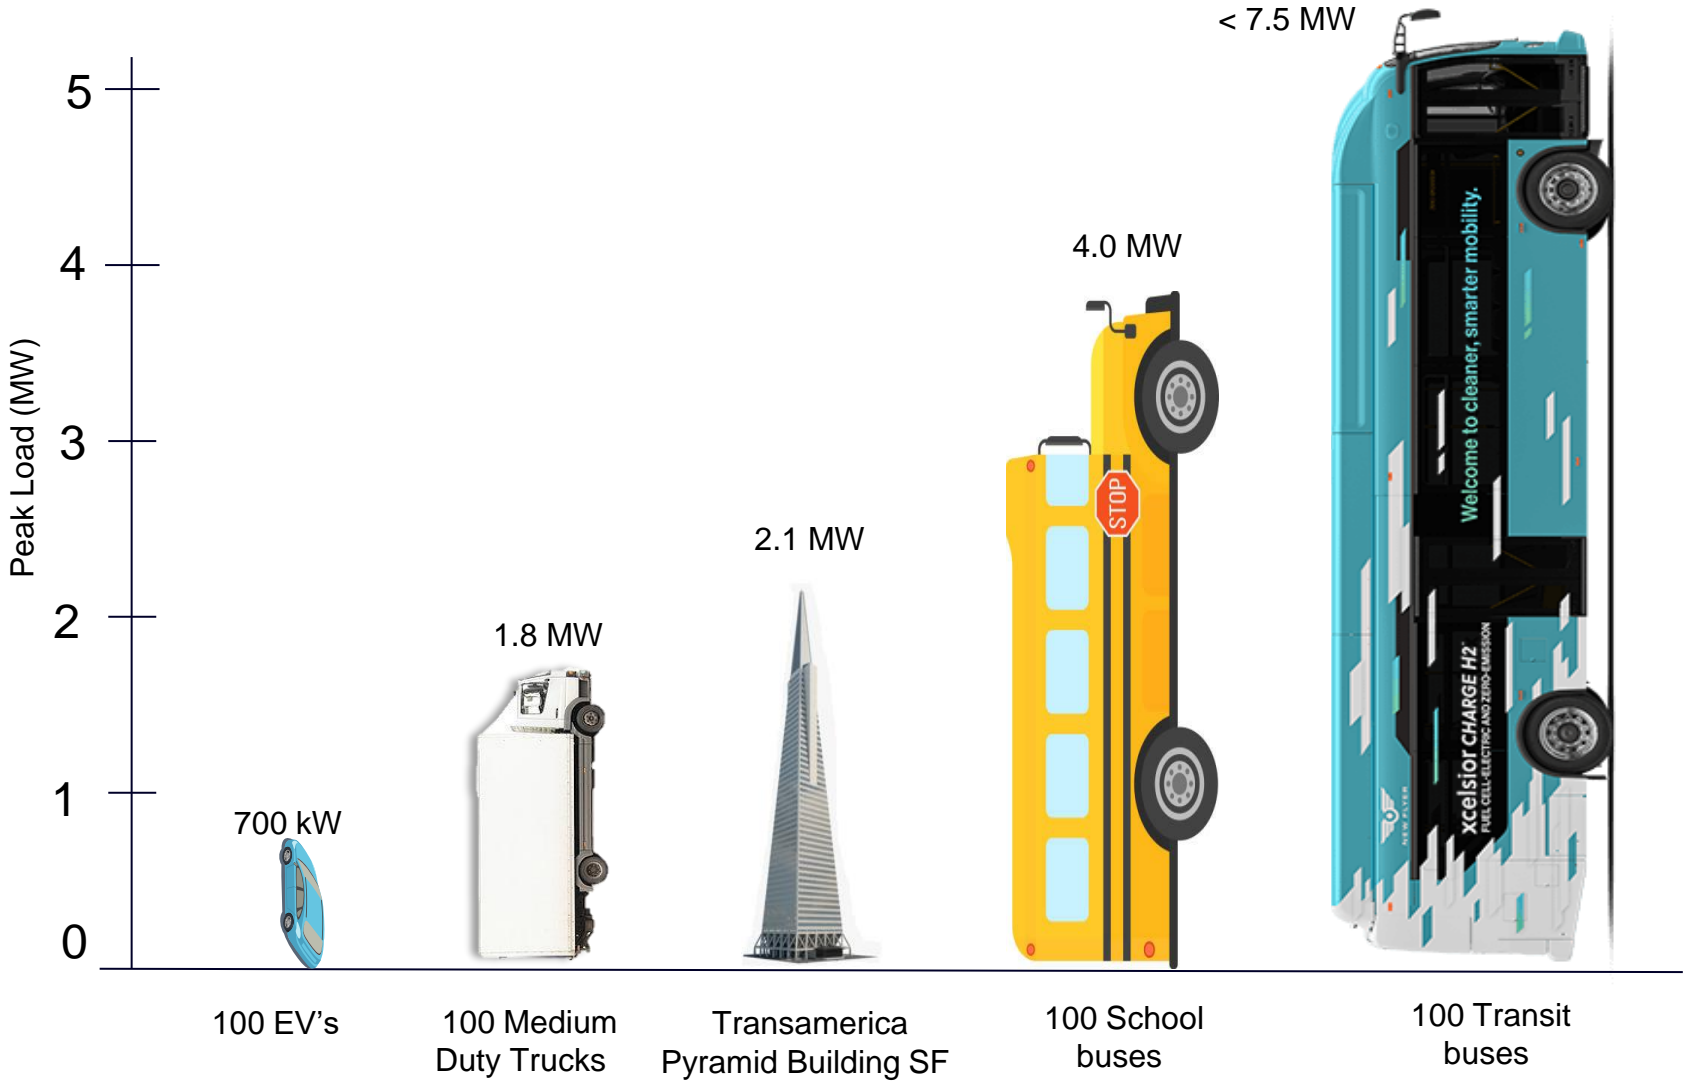

3) Should I Explore a Microgrid for My School?

4) How Can a Microgrid Help My District Afford to Electrify Our Transportation Fleet?

Case Study:  
Williamsfield Schools, IL

# PlugtoGrid™ Scale Up

## Highlights

- Siemens one of a few capable in market for scaled deployments
- Load Management is a critical enabler for scale up
- New build planning for scaled up charging infrastructure deployments, up front consulting
- Microgrids and Renewables integration will address choke points for deployment in existing facilities and new build facilities.

# Distributed Energy System Buildout

## Phase I - EV Charging of 10 School Buses

| Hour Ending         | 10 Bus Fleet L2 Chargers Only | Phase 1 - Energy Needs (kWh) |
|---------------------|-------------------------------|------------------------------|
| 0:00                | 1625                          | 115                          |
| 1:00                | 1740                          | 115                          |

| 23:00               | 345                       |
| <b>Daily Sum</b>    | <b>5,920</b>              |
| <b>Driving Days</b> | <b>200</b>                |
| <b>Annual Sum</b>   | <b>1,184,000</b>          |

Increase Level rough system deployment

Another 1,000 homes' energy use.

Roughly half the load of large high school

## What Can You Hope to Get Out of This Session?

- 1) What is Causing Interest in Electric School Buses?
- 2) What is a Microgrid?
- 3) Should I Explore a Microgrid for My School?
- 4) How Can a Microgrid Help My District Afford to Electrify Our Transportation Fleet?

Case Study:  
Williamsfield Schools, IL

# Williamsfield Schools (Williamsfield, IL)

## MORE

- Founder of the [Bus-2-Grid Initiative](#) (B2G)
- In Illinois, B2G is a service of IEC Powered by Future Green
- B2G has a comprehensive list of industry partners
- B2G is a partner of the World Resources Institute
- Helped secure funding for 2 electric school buses (ESBs) in central Illinois (Pekin & Hollis)
- Helped secure IL-VW funding last fall (Huntley, River Trails, Troy Triad, Waukegan)
- Secured ISBE school maintenance grant for ESB infrastructure (Williamsfield Schools)
- Secured ESSER III funding for a repowered electric school bus & charging infrastructure
- Helped schools apply for Clean School Bus funding (Fall 22)
- Helping schools plan & procure buses/chargers

# BENEFITS

## HEALTHY

Provide healthy environments for school bus riders

## EFFICIENCY

Improve operational efficiency (cost reduction + stability)

## RESILIENCE

Increase energy resilience

## SUSTAINABLE

Decrease our carbon footprint

## BACKGROUND

2011-2014 Eleven Outages (744m per year), 2 lasting more than 7 hours

2015-2019 Twenty Outages (1776m per year), 6 lasting more than 7 hours

March 2014

Students build Microgrid project

**July 2015**

Illinois Clean Energy Community Foundation Solar Grant

**Sept 2015**  
Student Microgrid Project

Arne Duncan  
US Secretary of Education

**March 2018**

Received first electric bus bid for \$400,000

**Jan 2019**

Lost power and pipes began to freeze

**2015-2019**

- Twenty Outages (1776m per year)
- 6 lasting more than 7 hours

**2011-2014**

- Eleven Outages (744m per year)
- 2 lasting more than 7 hours

**April 2019**

Adjustable Block Program Renewable Energy Credit Lottery

**August 2019**

Ready for solar grid to go live and looking to electrify our fleet.  
Realized our buses sit motionless 92% of the calendar year.

Can our fleet of bus batteries be used for energy storage?

**April 2019**

- Established the Bus-2-Grid Initiative and designed our campus mini-microgrid.
- Helped Pekin & Hollis secure funding for electric buses.
- Submitted unsuccessful DERA applications in 2020 & 2021. Looking for way to fund the project!

# Energy Cost Comparison

| Year        | Savings | Assets & Partners         |
|-------------|---------|---------------------------|
| <b>FY21</b> | 19%     | Solar & Nextera           |
| <b>FY22</b> | 35%     | Solar & IEC-FG            |
| <b>FY23</b> | 36%     | Solar & IEC-FG            |
| <b>FY24</b> | *61%    | Solar, IEC-FG, & ESBs (4) |
| <b>FY25</b> | *56%    | Solar, IEC-FG, & ESBs (4) |
| <b>FY26</b> | *53%    | Solar, IEC-FG, & ESBs (4) |

\* Does not include peak shaving & potential V2G credits

# February 2020

## Connected Solar Array & planted empty conduit

**Spring 2020**

Installed single axis, 204kW, strategically just north of bus barn

# V2G SOLAR BUS BARN (with supplemental energy storage)

67kW rooftop solar panels (estimate)

**V2G DCFC DISPENSER**

**20kW LEVEL 2 AC CHARGER (mechanic bay)**

**125kW V2G POWER CONTROL SYSTEM**

**SUPPLEMENTAL BATTERY (outside north of barn)**

B4

(6) 180kWh bus batteries  
(3) 130kWh bus batteries  
(1) 500kWh suppl battery  
1970kWh TOTAL capacity

ET 1.01

# BUS BARN

**PowerPact™**

## Summer 2020

Electric infrastructure upgrades  
as part of HVAC project with  
full fleet electrification in mind

Summer 2020

**Pekin power control system (PCS) & dispenser (V2G DCFC)**

**Hollis Level 2 charging station**

**Studied EV charger market with energy aggregation and V2G revenue opportunities in mind**

## What do electric motors look like?

**Blue Bird electric motor**

**Lion Electric electric motor**

**IC-Bus electric motor**

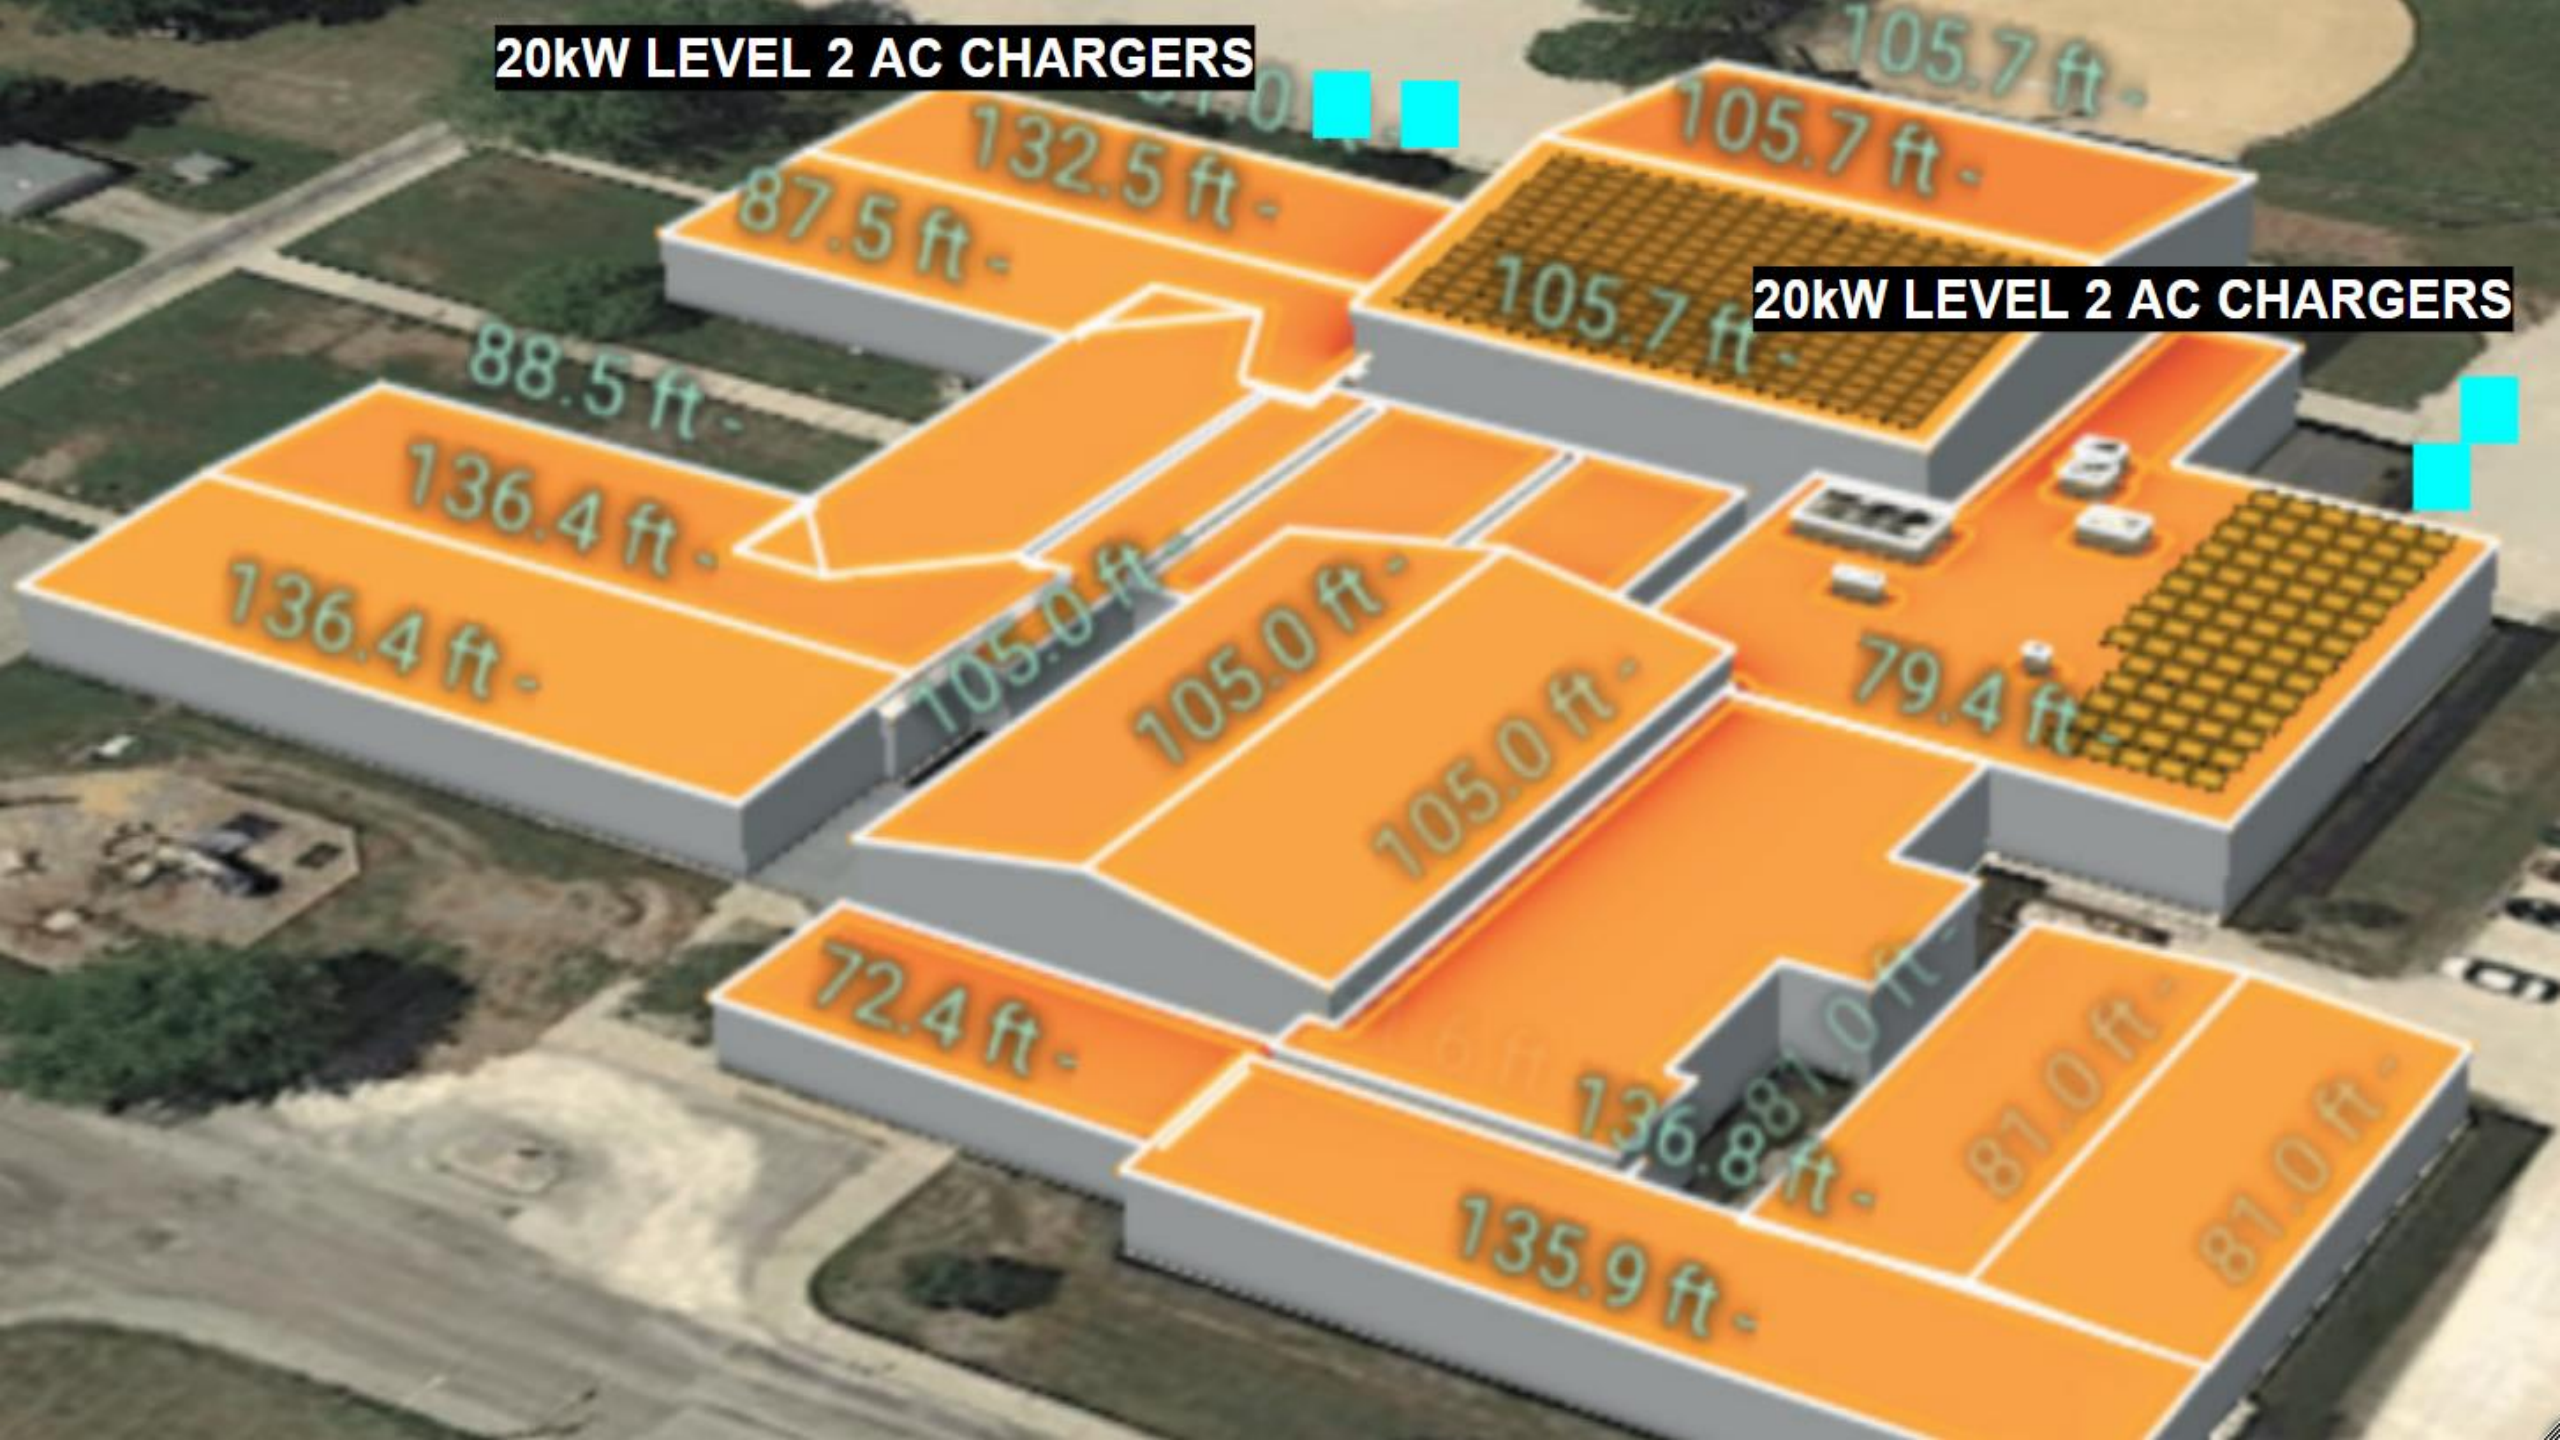

**Oct 2022**

Ordered an IC-Bus Repowered Bus

ESSER III grant approved for Repowered Bus & infrastructure

**20kW LEVEL 2 AC CHARGERS**

**20kW LEVEL 2 AC CHARGERS**

**We can't wait to flip the switch!**

If we can do it, any district can!

## Questions to guide a course of action

1. How many miles is each daily route?
2. What portion of the year do your buses sit still?
3. Is your bus barn/depot behind the same meter as a school building? If not, could it be?
4. Do you want to use ESBs for energy resiliency? If so, where?
5. Do you want to position yourself to leverage future V2G credit/revenue opportunities?
6. Design your ideal scenario
