

Building 2-Way Communication

Multi-tiered systems of support

THANK YOU

THANK YOU for your support of students

What action steps can be taken when there are reoccurring challenges with a particular student on the bus, such as a student that needs additional support?

Let's break into pairs or small discussion groups.

As pairs or small groups, please brainstorm action steps for students who need additional support (no names of course).

Please make a list of possible action steps. Is there a volunteer in the room who would take notes of everything I write on the whiteboard? We have about a minute for discussion and then I will call on each pair or group for their input.

If you would like to receive these notes by email, please sign up on the clipboard being passed around. I will email the solutions we discuss, onto you.

58% of all Wisconsin schools have been trained in PBIS (Wisconsin RtI Center).

Why PBIS?

Increased Valuable Time

Reduction in Incidents:

- ☐ Decreased bus/
classroom disruptions
- ☐ Increased Time To Drive
The Bus With Fewer
Distractions!

What is PBIS?

PBIS is for schools, uses data-based decision making and is used in states across the nation.

PBIS is a support process, that takes place over time.

Positive Behavioral Interventions and Supports

- A systems approach to improve student behavior
- Focus on positive behavior
- Focus on relationships
- Clearly defined expectations

What action steps can be taken to support newer drivers?

How do we create a team feeling between educational administrators and school bus staff?

How do we know if our actions are reducing school bus incidents?

Children's Promise School Bus Driver PBIS Training includes access to a driver survey that provides data on 2-way communication between educational leaders and members of the bus driver staff.

What are the barriers to establishing a school bus staff/educational staff team for examining school bus data at least once a year, to brainstorm action steps for resolutions?

There was a 40% decrease in bus incidents within one Wisconsin school district and a more than 50% decrease in another district after Children's Promise driver training.

THANK YOU

for making a
difference in
the lives of your
students, and
their families.
